SUMMARY

Senior Software Engineer professional with over 8 years of experience in software development and API integration, expert in .NET and React. Key achievements include the successful development and delivery of a dashboard used by over 10 internal teams within 3 months, achieving a 100% on-time delivery for pilot warehouse solutions, and improving API processing time by 25% through efficient script migration and optimization. Over the years I have worked in several domains like Energy, supply chain, Travel, reverse logistics.

SKILLS

Language & Frameworks

C#.Net, JavaScript, Typescript, Python, , ASP.NET Core MVC, React, Angular, FastApi

Database

SQL Server, MongoDB, Redis, Firestore

Cloud

Azure, Azure DevOps,

EXPERIENCE

10/2022 - Present

Gurgaon(Remote)

Senior Software Engineer

Fareportal

- Worked on developing a new dashboard for internal config management for several teams consuming our team's side of APIs and SDKs
- Migrated existing API to another API as part of stripping away responsibility of existing API which was earlier catering to requirements of different projects
- Created migration scripts to migrate data from old system to new system
- Worked with DevOps teams to resolve various ad-hoc pipeline, deployment, and outage issues
- Added meaningful test cases, both unit and integration, for the different APIs and SDKs
- Improved response time of high latency endpoints using optimization measures, queries tuning by avoiding table scans, adding index, benchmarking

06/2021 - 09/2022

Bangalore, India

Senior Software Engineer

Fulfillment IQ

- Worked in 2 pilot projects to create warehouse solutions for the client within challenging time limits.
- Created MVP for warehouse Executions system, from using scratch using react and .net core.
- Worked on building in house product for the company leveraging react frameworks like ant-design
- Worked on creating returns portal for a client to process the returns of the customer form scratch using Angular.
- Took part all the phases of software development including requirement gathering, scoping,tech choices, implementations, in close coordination with small team.
- Worked on cloud solutions like authentication system using Azure B2C, api management, azure functions, blob storage, applications insights for monitoring and logging.
- Refactored api to leverage design patters like CQRS & mediator patterns.
- Worked on custom middleware's and extension methods

01/2021 - 01/2022

Bangalore, India

Software Engineer

Infosys Ltd

- Developed new solutions from scratch by accurately understanding the client needs.
- Analysed requirements by gathering data and refactoring the codebase working with Agile Software Development team.
- Involved in deployments with CI/CD pipelines and DevOps developed new controls/features to enhance the application
- Worked on dashboard creation for server status and upgrade project using angular as frontend framework and .net core web api for backend

KEY ACHIEVEMENTS

Pilot Project Leadership

Led pilot projects achieving 100% on-time delivery for warehouse solutions.

Successful migration from old system

Migrated old system with updated new system with higher performance in stipulated timelines.

Warehouse MVP Creation

Led warehouse project completing MVP in 2 months with React, .NET Core.

API Processing Enhancement

Improved API processing by 25% through script optimization and migration.
